PROFESSIONAL SUMMARY

I am a detail oriented Web Developer and graduate in Computer Science majoring in Front-End Engineering and Content Administration. Having professional experience in managing backend CMS workflow on the Cyclofoss Technologies Limited, I apply technical skills to create responsive websites, simplify work procedures, and maximize the user experiences.

WORK HISTORY

Web Content Administrator, 01/2025 - 12/2025
Cyclofoss Technologies Limited, Lagos, Nigeria

- Backend Management: Managing company's backend portal to upload, format, and post high volumes of job listings daily, ensuring 100% uptime of fresh content.
- Quality Assurance: Conduct rigorous proofreading and data validation of external job posts to ensure meeting Cyclofoss's quality standards before going live.
- System Optimization: Collaborate with IT team to identify and report bugs within job submission portal, improving overall efficiency of data entry process.
- Operational Efficiency: Maintain consistent content schedule, ensuring specific targets for daily job uploads are consistently met and exceeded.
- Maintained high levels of data accuracy for smooth business operations by conducting regular database audits.

Web Developer & Automation Engineer, 10/2025 - current
Freelance / Self-Employed, Lagos, Lagos

- Front-End Architecture: Designed and developed responsive web applications for diverse clients, including an e-commerce platform ("Caroline's Foods") and a non-profit portal ("The Purple Love Charity Foundation"), ensuring 100% mobile responsiveness.
- Automation Engineering: Engineered a serverless backend using n8n to automate complex data pipelines, successfully replacing traditional server-side scripts for form handling and database management.
- Workflow Optimization: Implemented logic-based workflows that instantly synchronize volunteer data between web forms and Google Sheets, reducing manual administrative data entry by approximately 40%.
